PROFILE

As a highly motivated and coming from a result-driver background, I have 2 years of development experience working on both personal and industrial projects for people from around the world connected by the platforms like Upwork, Fiverr, even the social media platforms like Instagram. I always looking to take on challenging projects because they are the best form of learning and self improvement.

WORK EXPERIENCE

MOTION GRAPHICS DESIGNER Jan 2020 -

Fiverr Present

I started working as a video editor and motion graphics designer and sold my gigs to over 70+ clients within a year which primarily helped me in finding my interest, polishing my skills, and improving my communication skills.

WEB DEVELOPER March 2020

Upwork and Fiverr present

After working as a motion graphics designer, I shifted, not after long, to web development as I found it really catchy and interesting as it interlinks with my interests of coding and development. I have mostly worked on personal projects for self-Improvement but some of the projects are worth listing.

- Developed a full fledge web application for a client to sell their services that includes chatting with clients, online public forums and forums for only subscribed users, and many more features.
- Developed a website for a software house `Cyber Alpha` as their landing site.
- Used Node JS to use Google's cloud service API (Speech to Text) to convert audio coming from a .m3u8 livestream and transcript it, using Google's API to display the live captions.
- Developed a website for a salon in London which and integrated services like PayPal Payment Gateway and Emails from visitors.
- A software for a local retailer for managing the store items and making sales and generating bills, integrated it with Firebase as per client's needs.
